

HER2/neu IHC

REPORT DATE BOOKING ID PATIENT Ratanlal Gupta 19 Aug 2019 #011908090256

Human Epidermal Growth Factor Receptor 2 Immunohistochemistry

Clinician

Clinician Name: Dr. Amit Verma Medical Facility: Max Hospital. Pathologist: Not Provided

Human Epidermal Growth Factor Receptor 2 (HER2/neu): Negative (Score 0)

Microscopy Evaluation

HE Staining (Figure 1)

Tumor cells: 60%

Her2/neu by IHC: Negative (Score 0)

Percentage of cells with uniform membrane staining: 00% (Figure 2)

HE Stained Section

Clinical Information

Test Description

Human epidermal growth factor receptor 2 (HER2), is a protooncogene located on chromosome 17q21 that encodes a transmembrane protein with tyrosine kinase activity, a member of the HER receptor family and is involved in signal transduction pathways, leading to cell growth and differentiation. Amplification and overexpression of the HER2 gene have been associated with a shorter disease-free survival and shorter overall survival in gastric and gastroesophageal junction cancers, as well as breast, endometrial, and ovarian cancer.

Test is useful for determining overexpression of HER2 protein of

gastric and esophageal adenocarcinoma in formalin-fixed, paraffin-

embedded tissue sections (with reflex to FISH testing).

Specimen

Sample Type: FFPE Block B 2683/19

Site: Rectum

Pathology ID: MOLQ/IHC-34082019

Disease: Moderately Differentiated Adenocarcinoma of Rectum

The scoring system is based on type and origin of tumor.

Score	Staining Pattern	Interpretation
0	No staining or <10% of cells	Negative
1+	Faint incomplete staining of cell	Negative
	membrane in >10% of Tumor cells.	
2+	Weak to moderate complete staining of	Weak Positive/
	cell membrane >10% of Tumor cells.	Equivocal
3+	Strong complete staining of cell	Strong Positive
	membrane in >10% of Tumor cells.	

Interpretation

Results are reported as positive (3+ HER2 protein expression), equivocal (2+), or negative (0 or 1+).

Equivocal (2+) cases will automatically reflex to FISH testing at an additional charge.

Methodology

Immunostaining for HER2 protein was done using PathnSitu Rabbit Anti-Human HER2 monoclonal (Clone EP3) antibody (#PR047)
