

**Booking Date** 25/12/2019

**Patient ID** 011912250269

**Printed on** 23/01/2020

**Name** Aarav

**Age** 4 years

**Sex** Male

**Ref by** Dogra Path Lab

**DIAGNOSIS:** Normal Male Karyotype

**KARYOTYPE:** 46, XY

**INTERPRETATION:**

Normal male chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis.

**KARYOTYPE:**

**Peripheral Blood Chromosomal Analysis:**

**Please Note:** Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders.
