

Date of Report 26/01/2020  
PRISCA 5.0.2.37

| Patient Data   |             |             |   |             |
|--|-------------|-------------|---|-------------|
| Name   | Mrs Runni   | Patient ID  | 012001250172  |             |
| Birthday   | 7/8/1992    | Sample ID   | 10607174  |             |
| Age at delivery  | 27.5        | Sample Date | 25/01/2020  |             |
| Gestational age  | 13+6        |             |   |             |
| Correction factors   |             |             |   |             |
| Fetuses  | 1 IVF       | unknown     | Previous trisomy 21   | unknown     |
| Weight in kg   | 64          | Diabetes    | no  | Pregnancies |
| Smoker   | no          | Origin      | Asian   |             |
| Biochemical Data   |             |             | Ultrasound Data   |             |
| Parameter  | Value       | Corr Mom    | Method  | BPD         |
| PAPP-A   | 4.65 mIU/ml | 0.71        | BPD (in mm)   | 24          |
| fb-hCG   | 27.1 ng/ml  | 0.69        | LMP   | 23/10/19    |
| Risks at sampling date   |             |             | Scan Date   | 24/01/2020  |
| Age Risk at sampling date  | 1:868       |             | Sample Date   | 25/01/2020  |
| Overall Population Risk  | 1:600       |             | Nasal Bone  | Present     |
| Trisomy 21 risk  | 1:5590      |             |   |             |
| Trisomy 13/18  | <1:10000    |             |   |             |
| Risk   |             |             | Down's Syndrome Risk (Trisomy 21 Screening)   |             |
|  |             |             | <p>The calculated risk for Trisomy 21 is below the cut off, which indicates a low risk.</p> <p>After the result of the Trisomy 21 test it is expected that among more than 10000 women with the same data, there is one woman with a trisomy 21 pregnancy.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that the risk calculations are statistical approaches and have no diagnostic value!</p> |             |
| Trisomy 13/18  |             |             | The laboratory cannot be hold responsible for their impact on the risk assessment! Calculated risks have no diagnostic values   |             |
| The calculated risk for trisomy 13/18 is <1:10000, which represents a low risk.    |             |             |   |             |
