Name	Priyanka	Age	- 33 YRS	Sex	- Female

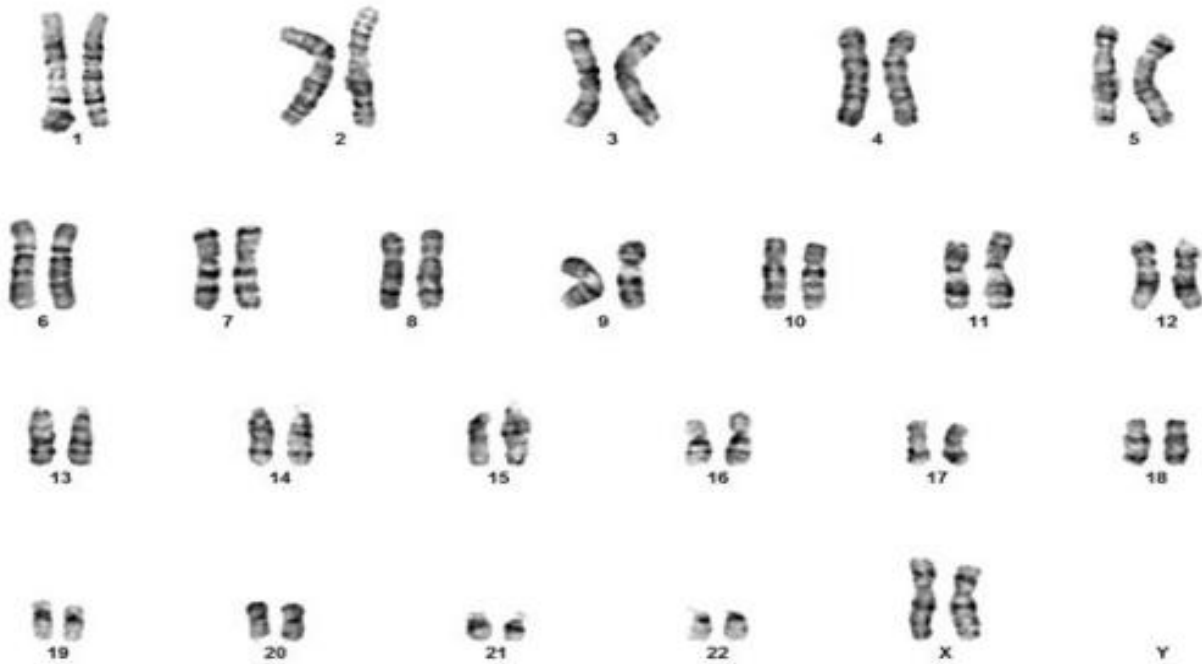

DIAGNOSIS: Karyotype - Blood

KARYOTYPE: 46, XX

INTERPRETATION:

Normal Female chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis.

KARYOTYPE:

Disclaimer: Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders.
