MR No:                      Date: 17/8/21  
Consultant: Dr. Shikha Arora

**OPD CARD**

Height:                      Weight:                      B.P.:                      Temp.:                      Pulse:

Chief Complaints: Non-healing wound intraorally

General & Physical Examination:

Systemic Examination: O/E = White plaque over the  
vestibular mucosa int<sup>or</sup> of  
over buccal vestibule area (due to trauma

Drug Allergy:

Investigation Advice:

from teeth bite)

Treatment Advice:

Size of  
whitish lesion  
is about  
1x2 cms. in the  
buccal vestibule.

The vestibular area has white slough  
and irregular margins.

Size increased gradually over  
a period of time. Since one month.

Sharp tooth cuspal grinding done  
to reduce trauma.

Tak A to Z o x 10 days.

Zytee gum stringent
