**CYTOGENETICS**  
**REPORT**

Test Name:Karyotype - Blood

**RESULT:**

Method: G-banding  
Metaphases counted: 20  
Metaphases analyzed: 20  
Metaphases karyotyped: 20  
Banding Resolution: 400  
Karyotype (ISCN 2016): 46,XX  
Result: Normal

**INTERPRETATION:**

**KARYOTYPE:**

**Disclaimer:** Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders. MOLQ can assist the physician in determining the appropriate test in the context of clinical indications.
