IMMUNOASSAY

| Test Description | Observed Value | Biological Reference Range |
|--|----------------|----------------------------|
| ALLERGY COMPREHENSIVE PANEL(FOOD+INHALANT+NON VEG+DRUG) | | |
| Total IgE Chemiluminescence Immunoassay (CLIA) | 55.5 | 0-100 IU/ml |

Interpretation:

Having a quantitative Total IgE test result when investigating patients with suspected allergy opens up important new possibilities. Together with the medical history and a physical examination, you will be able to plan the best possible treatment. In some cases, you may even rule out allergy as the cause and thereby reducing worry and unnecessary food avoidance !
