		Down's Syndro	ome Risk (Trisomy 21 S	creening)		
Risk 1:10			The calculated risk for Trisomy 21 (with NT) is below the cut off, which represents a low risk.			
1:100 1:250 1:1000			After the result of the Trisomy 21 test it is expected that among more than 10000 women with the same data, there is one woman with a trisomy 21 pregnancy and 9999 women with not affected pregnancies. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that the risk calculations are statistical aapproaches and have no diagnostic value! The laboratory cannot be hold responsible for their impact on the risk assessment! Calculated risks have no diagnostic values
