	1.7
	1.09
Biochemical T21 risk <a>&lt;1:10000</a> Nasal Bone	Present
Combined T21 risk <1:10000	
Trisomy 13/18+NT <1:10000	
Risk Down's Syndrome Risk (Trisomy 21 Screening)	
Trisomy 13/18+NT The calculated risk for Trisomy 13/18 with NT is <1:1000 Risk Above Cut Off Risk Above Cut Off Risk Above Cut Off Risk above Age Risk The calculated risk for Trisomy 12 (with NT) is bel cut off, which represents a low risk. After the result of the Trisomy 21 test it is expected that among more than 10000 women with test same data, there is one woman with a trisomy 21 pregnancy and 9999 women with not affected pregna The calculated risk by PRISCA depends on the accu the information provided by the referring physician. I note that the risk calculations are statistical aapproach have no diagnostic value! The laboratory cannot be hold responsible for their i on the risk assessment! Calculated risks have no diagnostic values Risk above Age Risk Risk above Age Risk Risk below Age	he ncies. racy of Please ies and mpact
