Name	SHAHZADA PARVEEZ	Maternal Age- 27 Years	Sex - Female
Ref By	G.K Lab Srinagar		

Test Name : Karyotype - Product of Conception

RESULT:

Method: G-banding
 Metaphases counted: 20
 Metaphases analyzed: 20
 Metaphases karyotyped: 20
 Banding Resolution: 400
 Karyotype (ISCN 2016): 46,XX

INTERPRETATION:

Normal female chromosome complement. There is no evidence of aneuploidy or structural rearrangement at the resolution of banding analysis.

KARYOTYPE:

Disclaimer: Although the methodology used in this analysis and interpretation is highly accurate, it does not detect small rearrangements and very low-level mosaicism, which are detectable only by molecular methods. Failure to detect an alteration at any locus does not exclude the diagnosis of any of the disorders
