IMMUNOASSAY

Test Description	Observed Value	Biological Reference Range	Method
ALLERGY COMPREHENSIVE (DRUG)			
Total IgE	259.8	0-100 IU/ml	Chemiluminescence Immunoassay (CLIA)

Interpretation:
Having a quantitative Total IgE test result when investigating patients with suspected allergy opens up important new possibilities. Together with the medical history and a physical examination, you will be able to plan the best possible treatment. In some cases, you may even rule out allergy as the cause and thereby reducing worry and unnecessary food avoidance !
