		Down's Syndro	ome Risk (Trisomy 21 Screeni	ng)	
1:100 1:1000 1:1000 1:10000 1:10000 1:10000 13 15 17 19 21 23 25 27 29 31 33 35 37 39 41 43 45 47 49 Age Trisomy 13/18 The calculated risk for Trisomy 13/18 is <1:10000 , which indicates a low risk			The calculated risk for Trisomy 21 is below the cut off, which represents a low risk. After the result of the Trisomy 21 test it is expected that among 3963 women with the same data, there is one woman with a trisomy 21 pregnancy and 3962 women with not affected pregnancies. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that the risk calculations are statistical aapproaches and have no diagnostic value! The laboratory cannot be hold responsible for their impact on the risk assessment! Calculated risks have no diagnostic values Risk above Age Risk Risk below Age risk
