| 1:1000            |                   |          |  | The calculated indicates a low                              | l risk for Trisomy 18<br>7 risk | is <1:10000, which                                   |

Neural Tube Defect (NTD) Screening

The corrected MoM for AFP (0.93) is located in the low risk area for neural tube defects.

The laboratory can not be held responsible for their impact on the risk assessment! Calculated value has no diagnostic value!
