1:100 1:1000 1:1000 1:10000 1:10000 1:10000 1:10000 The calculated risk for Trisomy 13/18 (with NT) is <1:10000, which indicates a low risk			The calculated risk for Trisomy 21 (with NT) is below the cut off, which represents a low risk.  After the result of the Trisomy 21 test (with NT) it is expected that among 3159 women with the same data, there is one woman with a trisomy 21 pregnancy and 3158 women with not affected pregnancies.  The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that the risk calculations are statistical aapproaches and have no diagnostic value!  The patient combined risk presumes that NT measurement was done according to accepted guidelines (Prenat Diagn 18:511-523; 1998).  The laboratory cannot be hold responsible for their impact on the risk assessment! Calculated risks have no diagnostic values		
		35 37 39 41 43 45 47 49	Cut off  Cut off  Cut off  Cut off  After the result of expected that and there is one won 3158 women with The calculated result of the risk calculated result of the risk calculated diagnostic value. The patient condone according 1998).  The laboratory of the risk calculated diagnostic value. The patient condone according 1998).	The calculated risk for Trisomy 21 (we cut off, which represents a low risk.)  After the result of the Trisomy 21 test (with expected that among 3159 women with the there is one woman with a trisomy 21 pregonancies. The calculated risk by PRISCA depends of information provided by the referring physical than the risk calculations are statistical approached diagnostic value!  The patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the Proposition of the Trisomy 21 (with NTT) is \$\left(110000)\$.  The laboratory cannot be hold responsible to the proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk pregonal Proposition of the patient combined risk presumes that done according to accepted guidelines (Pregonal Proposition of the patient combined risk pregonal Proposition of the patient combined risk pregonal Proposition of the patient combined risk pregonal Proposition of
