

Name of Patient : Mr ABHISHEK

Date : 14-Nov-2023

Age/Gender : 22/M

Barcode : 11828468

IMMUNOASSAY

| Test Description | Observed value | Biological Reference Range | Method |
|-----------------------------------------------------------------------|-----------------------|---------------------------------------|-----------------------------------------|
| ALLERGY COMPREHENSIVE PANEL (FOOD + INHALANT + NON-VEG + DRUG) | | | |
| Serum IgE | >3000.0 | 0.0- 158.0 IU/mL | Chemiluminescence Immunoassay (CLIA) |

Interpretation:

Having a quantitative IgE test result when investigating patients with suspected allergy opens up important new possibilities. Together with the medical history and a physical examination, you will be able to plan the best possible treatment. In some cases, you may even rule out allergy as the cause and thereby reducing worry and unnecessary food avoidance !

ALLERGY SCREENING TEST

NORMAL VALUE FOR ALL ALLERGEN IS LESS THAN 0.35 IU/mL
