Please note that the risk calculations are statistical aapproaches and have no diagnostic value!<br>The patient combined risk presumes that NT measurement was done according to accepted guidelines (Prenat Diagn 18:511-523; 1998).<br>The laboratory cannot be hold responsible for their impact on the risk assessment! Calculated risks have no diagnostic values |                          |                        |
