

Date of Report 22/05/2024  
PRISCA 5.2.0.13

| Patient Data    | Value      |             |              |
|-----------------|------------|-------------|--------------|
| Name            | NEEUS      | Patient ID  | 012405200059 |
| Birthday        | 11/10/1996 | Sample ID   | 11477224     |
| Age at delivery | 28.10      | Sample Date | 20/05/2024   |

| Correction factors |    |                     |         |
|--------------------|----|---------------------|---------|
| Fetuses            | 1  | IVF                 | unknown |
| Weight in kg       | 63 | Diabetes            | NO      |
| Smoker             | NO | Origin              | Asian   |
|                    |    | Previous trisomy 21 | unknown |
|                    |    | Pregnancies         | unknown |

| Biochemical Data |                |          | Risks at sampling date  |               |
|------------------|----------------|----------|-------------------------|---------------|
| Parameter        | Value          | Corr MoM |                         |               |
| AFP              | 41.7 ng/ml     | 1.26     | Nuchal translucency     | 1:1159        |
| uE3              | 0.96 ng/ml     | 1.44     | Biochemical Risk +NT    | <1:10000      |
| hCG              | 25539.1 mIU/ml | 0.82     | Neural Tube Defect Risk | Low risk area |
| Inhibin-A        | 180.5 IU/ml    | 1.16     | Trisomy 18              | < 1:10,000    |

| Ultrasound Data                                   |                  |                                |          |
|---|------------------|--------------------------------|----------|
| Day of ultrasound                                 | 29/04/2024       | Nuchal translucency            | 1.36 mm  |
| Gestational age                                   | 13+1             |                                | 0.78 Mom |
| Method  | BPD (<=>Hadlock) | Nasal bone                     | present  |
| CRL   | 69.7 MM          | Measured by                    | Dr       |
| Gestational age on the day of serum taking : 16+1 |                  | Qualifications in measuring NT | MBBS     |

The patient combined risk presumes the NT measurement was done according to accepted guidelines (Prenat Diagn 18: 511-523 (1998)).  
The laboratory can not be hold responsible for their impact on the risk assessment Calculated risks have no diagnostic value.

| Trisomy 18  |
|---|
| The calculated risk for Trisomy 18 is < 1:10000, which represents a low risk              |
| Neural Tube Defect (NTD) Screening  |
| The corrected MoM for AFP (1.26) is located in the low risk area for neural tube defects. |

The laboratory can not be held responsible for their impact on the risk assessment! Calculated value has no diagnostic value!

Risk Above Cut Off
  Risk above Age Risk
  Risk below Age risk
